

# HOW TO USE A CALENDAR WITH YOUR CHILD

It is a new year and a wonderful time to teach your child about a calendar!

Did you know that a calendar teaches math skills? It does!

- Young children learn to identify numbers and sequential order, the days of the week and months. It helps them to visually see when events (like birthdays) will happen. You might want to write in special events on your calendar
- Older children can use calendars for organization. In addition to special events, they should be using a calendar to record when projects are due. This helps them to become responsible
